Brand overview

This section defines the core identity of V2 Helicopters, capturing its history, values and the strategic intent behind the brand.

Who we are

V2 Helicopters is a Brisbane-based premium aviation provider delivering modern, reliable helicopter services across flight training, scenic experiences and bespoke charter operations. Backed by decades of expertise, we combine innovation with proven operational excellence to shape a trusted and forward-looking brand.

Mission and vision

V2 Helicopters exists to deliver premium, innovative helicopter services and pilot training built on safety, precision and continual improvement. Our vision is to set a trusted benchmark for modern aviation excellence, shaping confident pilots and exceptional flight experiences across Australia.

Brisbane, viewed from the flight deck.

Brand personality

The brand personality distils the character of V2 Helicopters, balancing its legacy of skill and trust with a modern, forward-moving spirit.

Logo

The V2 mark pairs a sheared V and 2 into one angular form. Two lockups and a standalone mark cover almost every use case.

Primary logo — stacked lockup

Use this format in most applications where the layout permits.

FIG. 01

Horizontal logo

Wide formats: navigation bars, fuselage decals, long signage.

FIG. 02

Logomark

For favicons, app icons and social avatars where the full wordmark won't read at small sizes.

FIG. 03

FIG. 04

Suggested minimum size: 32px tall for the stacked mark, 120px wide for the horizontal lockup. Below that, drop to the logomark alone.

Clear space

Minimum clear space around the logo preserves its impact and keeps it readable. Keep this zone free on every application.

x is the cap height of the HELICOPTERS wordmark. Keep at least 2x of clear space on every side, for both lockups.

Logo on colour

The lockup holds up on white, charcoal and lime. Keep it on solid, high-contrast grounds and avoid busy photography or low-contrast colour behind it.

Usage don'ts

Don't recolour the mark

Don't stretch or distort it

Don't rotate the lockup

Don't add shadows or gradients

Don't use low-contrast backgrounds

Don't rebuild or rearrange it

Brand colours

The palette pairs deep matte black with a high-visibility lime-yellow-green, giving the mark both technical authority and the kind of edge visibility you want on aviation equipment. Black anchors the wordmark and grounds the brand, while the green accent drives energy and forward motion through the angular V2 mark.

RGB	255 / 255 / 255

Brand fonts

The wordmark is set in a custom-cut display face: bold, angular and sheared to match the diagonal edge of the V2 mark. It exists only as the letterforms drawn for this lockup, not as a working font, so it is built for the logotype only and should be used elsewhere very sparingly. Every other application, headlines, body copy and UI, runs on Space Grotesk, a geometric sans with enough personality in its details to stay distinctive at small sizes without sacrificing legibility.

DISPLAY FACE, LOGOTYPE ONLY

Custom-cut, capital letters only. Not a general-purpose font: do not attempt to set other text in it.

SPACE GROTESK, EVERYTHING ELSE

Space Grotesk	300, LIGHT
Space Grotesk	400, REGULAR
Space Grotesk	500, MEDIUM
Space Grotesk	600, SEMIBOLD

BODY 16 / 400	V2 Helicopters operates a modern fleet maintained to the highest safety standards, with every aircraft inspected before takeoff.
SMALL 14 / 400	Availability subject to weather and airspace conditions.
LABEL 12 / 500	FLEET STATUS

Voice and tone

The personality traits on this page are not just adjectives for a mood board. They set the tone for everything V2 Helicopters writes, whether it's a charter quote, a training brochure or a scenic flight ad, so the voice needs to flex by audience without losing its character.

Do

- Write like a pilot briefing a passenger: clear, confident and calm.
- Lead with the fact, then the benefit, for charter and training copy.
- For scenic and leisure copy, let the moment carry the weight: the view, the light, the route.
- Use precise, real detail everywhere: flight times, aircraft models, locations, even when the copy is about the experience.

Don't

- Don't oversell with hype words like "amazing" or "incredible", scenic flights included.
- Don't bury the point in long, decorative sentences.
- Don't use jokey or casual language for safety-related content.
- Don't let scenic copy get so poetic it drops the practical detail: duration, price, what's included.

In use

A quick look at the horizontal lockup, Space Grotesk and Velocity Lime working together in a real navigation bar.

Logo left, navigation centred or right, one lime call to action. No more than one lime element per view so it keeps its punch.
